

Meralco and The Net Group advances green agenda with new EV charging station

Newly-installed EV charging station at Net Park, Bonifacio Global City makes use of coin-operated charging pod.

In a continued pursuit to promote sustainability in business and transportation, the country's biggest power distribution utility- Meralco, together with the largest green office building developer and operator - The Net Group (TNG), unveil the newest electric vehicle (EV) charging station in Net Park, Bonifacio Global City. Equipped with the latest innovations, the Net Park EV charging station has a coin-operated charging

pod suited for the increasing number of tenants or employees using emotorcycles or evehicles on their way to and from work. The Net Park EV charging station is TNG's second EV charging installation in partnership with Meralco (the first was in Net Lima, launched in 2014), geared towards the pursuit of Net Park's 5-star certification under BERDE (Building for Ecologically Responsive Design Excellence).
